

Vertical Conveyor

Save on space and increase efficiency with a vertical conveyor. The prorumner mk5 guarantees an uninterrupted product flow from one level to another. A cam follower system in these elevators features a shock free movement in which products are kept horizontal. These heavy duty and smartly designed vertical conveyors are also available in stainless steel.

Features include:

- Space saver
- Energy efficient
- Reliable
- Low maintenance cost

Advantages of the PRORUNNER mk5:

- No critical product transitions
- No start/stop movements
- C-Lift or Z-Lift line up possible
- Line feed and cross feed
- Can be used as a cross transfer
- Possibility for in and outfeed on more than two levels
- Number of carriers provide capacity (not speed)
- Drive system is closed column
- Easy access to product carrier
